

Quality policy

LEONI is one of the world's leading system partners and suppliers of wires, optical fibers, cables and cable systems through its Wire & Cable Solutions Division. With our management system we want to deal with the challenges in the global market in a sustainable way and with the quality and efficiency required.

Total Quality Management means to us:

- Customer orientation by a fast response to customer and market requirements
- Employee orientation in communication, information and qualification
- Process orientation with transparent and economic procedures
- Targeted preventive work will take precedence over reactive action.
- Continuous improvement of our products, processes and services
- Striving for faultless execution of all processes– Quality right from the start
