Function Packages Industrial Solutions

The Quality Connection

Scan to get more information on LEONI Function Packages.

Function Packages = Integration-Ready Robots

Our Integration-Ready Robots begin with a naked robot on which we install the dress package, end-of-arm tooling, weld controller, dense pack, electrical junction box etc. We optimize the dress pack, configure, setup and test the gun, software and Tool Center Point.

We have the capability to provide you with complete Function Packages, e.g. for spot welding, inert gas welding, measuring and handling. Should you already have corresponding robots or other hardware components, we shall incorporate these in the work we offer.

We also offer services like programming and training of your customer's staff.

Typical turnaround for line builders: 24 hours up

Without LEONI

- 1 Robot
- 2 Robot controller

With LEONI

Integration-Ready Robots = LEONI Function Packages

- 1 Robot
- 2 Robot controller
- 3 Robot dress pack
- 4 Robot end of arm tooling
- 5 Power and media supply
- 6 Programming service
- 7 Installation and setup service
- 8 PLC/HMI controller
- 9 Media panel
